FAQ'S BOOM MAT SPRAY-ON DAMPING MATERIAL

How does Boom Mat spray-on work?

BOOM MAT dampens sound as it hits body panels by absorbing the tiny vibrations they impart. It does this by adding mass to the panels which increases the rigidity of the panel. Less vibration means less noise.

How effective is Boom Mat Spray-On?

The Spray-On version of Boom Mat is very effective in hard to reach areas like trunk corners, inside doors, etc. It is not as effective as the sheet material, but is a great alternative to control noise and vibration where sheet material can not be applied.

Can I use Boom Mat Spray-On on the under side our outside of the vehicle?!

Yes. Spray-On is great to coat the under side of fenders and inside wheel wells to reduce road noise, help prevent rock staring on fender paint, and undercoat fenders and truck beds.

Does Boom Mat Spray-On control heat also?

No. Spray-On does not control much heat. It is designed for noise and sound control. It does little for heat protection.

Can I paint over Boom Mat Spray-On?

Yes. Once properly cured, Boom Mat Spray can be painted to match any color interior or exterior. .

How much does one can of Boom Mat Spray Cover?

One 18 ounce can covers approximately 20 square feet.
