FAQ'S CELL SAVER

How does Cell Saver install?

You simply wrap the insulating/reflective material around your battery, mark any areas you might need to trim out with scissors like battery terminals, and then trim to the proper length. Once trimmed to length, use the included Cool Tape to attach the two ends together.

Can I leave Cell Saver on during cold weather months also?

Yes. Cell Saver can stay on year around and protect your battery in all conditions.

What size battery does Cell Saver fit?

Cell Saver measures a large 40" wide by 7" tall, so it will fit the vast majority of all batteries.

IS the aluminum skin on Cell Saver conductive?

The aluminum skin can be conductive. Make sure to install Cell Saver with aluminum side facing out, and trimmed away from battery terminals.

What if my battery leaks acid accidentally?

Cell Saver includes an acid absorbing mat that goes under your battery to help absorb any leaks.
