FAQ'S RADIATOR RELIEF FLUSH

How does Radiator Relief Flush work?

Flush gets rid of deposits, oily build up and residue to help your cooling system run efficiently.

Will Radiator Relief Flush work with different coolants?

Yes, Radiator Relief works with all water based cooling systems.

Do I need to mix it?

Yes. Simply drain your system, add bottle of Radiator Relief Flush, fill system with water and run system for 15 minutes. Drain Flush and water out of system and re-fill cooling system with proper coolant.

How many bottles do I need per system?

One 16 ounce bottle is enough for most regularly-sized domestic V8 engine cooling systems.

Can I add Radiator Relief in my cooling system after i refill it?

Yes. It is recommended to add Radiator Relief coolant additive to keep coolant temperatures down in hot weather.
