

## Frequently Asked Questions

### DEI Turbo Insulation Kit™

#### *Will this fit my turbo?*

Turbo Insulation kit is universal and will fit most common size turbos. It was designed to be used on smaller turbos but will also fit larger turbos. The material provided can withstand 1200°F.

#### *Should I get exhaust wrap to cover my down pipe?*

You should wrap your downpipe also but you do not need to purchase additional wrap. The kit comes with 2" wide wrap and should be enough to cover most downpipes.

#### *What will this do for me?*

The turbo insulation kit will reduce under hood temps and reduce turbo lag.
