

## Frequently Asked Questions

### DEI Reflect-A-Gold™

#### ***Where can I use Reflect-A-Gold and what is its purpose?***

Reflect-A-Gold can be used on multiple surfaces, wrapped on lines, hoses or wires. This material is simple to install and is flexible enough to conform to most situations. It should not be wrapped directly on exhaust pipes. This material was designed to be used in the aerospace industry for use in extreme temperature swing environments. It will continue to function under 850 F temperatures. It can reflect up to eighty percent of radiant heat. Its self adhesive backing will make sure that the material will stay where it has been placed.

#### ***What size do I need?***

We offer our product in many forms. For smaller situations you can purchase it in roll form. We have it in one and a half inches by either fifteen feet or thirty feet. And two inches by fifteen feet or thirty feet. Also we sell it in sheet form. Twelve inches by twelve inches, twelve by twenty four inches, and twenty four by twenty four inches. For the major jobs or for use in a shop situation we also sell it by the large roll. The total roll is twenty four inches wide by one hundred and fifty feet.

#### ***Can the material be cut easily?***

Yes, the material is easy to cut. A simple pair of scissors or a razor will do the job.
