

LINE SLEEVE

NEW

EXO Sleeve™

EXO Series™ Sleeving has all the features of DEI's popular Fire Sleeve™ with one change that makes it ideal when extra protection is needed. EXO Sleeve is constructed of high temperature resistant glass material woven into a 100% silicone sleeve. EXO Sleeve has a 304 stainless steel exoskeleton exterior mesh that provides an added layer of protection to wires, lines and hoses exposed to harsh or abrasive conditions.

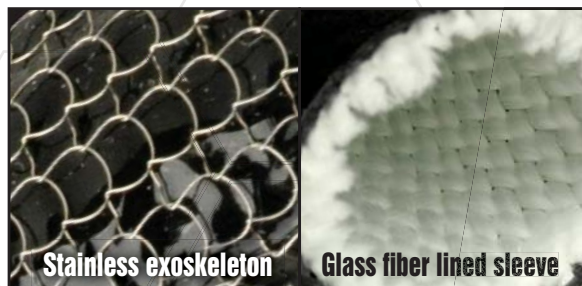

Withstands 500°F of direct continuous heat or 2000°F intermittent heat and works as a thermal insulator for wiring, hoses and oil, brake and transmission lines. This sleeve, encapsulated with the stainless steel mesh, allows for air flow around the silicone sleeve when in direct contact with a hot surface making it excellent to use around hot engines, exhaust systems and headers.

Sold with two feet of DEI Quick Fix Tape to seal the ends, it is available in two diameters: 3/8" x 3ft (part #010872) or 1" x 3ft (part #010873)

- 304 stainless mesh covering our Fire Sleeve line sleeving
- Includes 2ft of Quick Fix Tape
- Allows for air flow around the 100% silicone sleeve when in direct contact with a hot surface
- Excellent for areas around hot exhaust systems & headers

EXO SLEEVE

Part #	Description
010872	3/8" x 3ft
010873	1" x 3ft
