

HEAT BARRIER

NEW

C5 Corvette™ Transmission Tunnel Thermal Shields

A well know and long time problem with many Corvettes is the amount of heat transferred into and through the console. DEI has the solution to dramatically reduce the amount of heat transferred to the Corvette C5 and C6 Transmission Tunnel and into the vehicles' interior. These shields reduce the negative effects of in-cabin excessive high temperatures and improve the experience of driving a Corvette.

- Reduce console & interior temperatures
- Precision die cut for a perfect fit & ease of installation
- No need to remove the Transmission Tunnel Reinforcement Plate
- Also serves as a barrier to unwanted road & tire noise
- Withstands direct temperatures up to 1750°F
- Made of 10 mil embossed aluminum material
- Bonded to a high temp finely woven needle punched glass fiber composite material
- Aggressive self-adhesive backing holds past 450°F
- Not affected by wind, water or other harsh conditions
- Extremely light weight

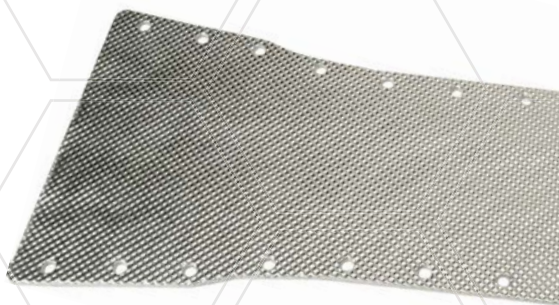

CORVETTE TRANS TUNNEL HEAT SHIELDS

Part # Description
