HONDA PIONEER 1000 SOUND DEADENING FLOOR MATS 2022-2025 HONDA PIONEER 1000-3

Overview:

These heavy-duty sound deadening floor mats are engineered specifically for the Honda Pioneer to reduce unwanted cabin noise from the engine, drivetrain, and harsh terrain. Manufactured from dense, recycled rubber, the mats absorb vibration and sound energy where it matters most—the floor—helping create a noticeably quieter, more refined ride without sacrificing durability. Built to handle mud, moisture, and extreme use, they're the perfect upgrade for riders who spend long days behind the wheel

KEY FEATURES

Quieter Cabin:

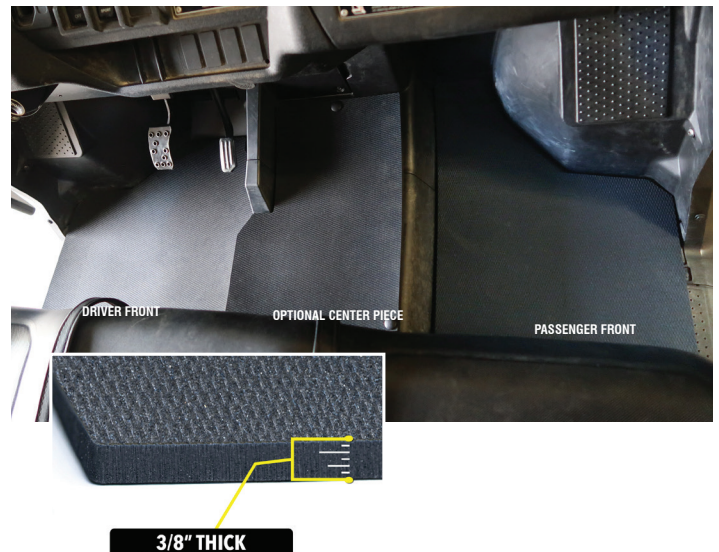

Deadens engine, drivetrain, and road noise and reduces vibrations from rough terrain

Vehicle Protection:

Protects interior floors from rock, mud and dirt scrapes and scuffs. The closed cell structure prevents moisture and bacteria from penetrating the surface. Helps keep your machine looking new and performing at it's best.

Constructed to Last

Made from heavy-duty recycled, closed-cell, anti-microbial rubber and at 3/8" thick, they will hold up against muddy, dirty boots and off-roading. They are durable, weather resistant and easy to clean. CNC cut for a precise fit in the Pioneer 1000-3 models.

PART # 902418
DRIVER & PASSENGER
FRONT - 2 PIECE KIT

PART # 902419
OPTIONAL- CENTER
FRONT SEAT

WHY CUSTOMERS NEED THIS PRODUCT

- Pioneer interiors are EXTREMELY noisy! This kit reduces noise and vibrations for comfortable ride.
- Improves acoustics and helps give a factory quality interior to unfinished floors
- Helps keep interior floors scuff and scrape free from dirt, mud and debris
